

MedVisionAI Radiology Terminology

Overview

This guide defines common radiology terms used in chest imaging to improve interpretation and communication.

Common Terms

Opacity, Consolidation, Infiltrate, Lucency, Hyperinflation, Atelectasis, Pleural Effusion, Pneumothorax, Cardiomegaly, Fibrosis, Nodule, Mass, Air Bronchogram, Silhouette Sign, Mediastinal Shift.

Descriptions

Opacity: Increased whiteness on X-ray. Consolidation: Alveoli filled with fluid. Lucency: Increased darkness due to more air. Atelectasis: Collapse of lung tissue. Hyperinflation: Excessive lung expansion. Air bronchogram: Air-filled bronchi visible within opaque lung.

Reporting Tips

Use standardized terminology, describe location, size, distribution, severity, and compare with prior studies when available.

Quick Facts

Consistency in terminology improves communication between clinicians and AI systems.
